About Vitworker

Vitworker company has been successfully operating in the market since 2016. We offer welding services provided by qualified specialists, whose years of experience are evident in each of our projects.

2020

Opening of a production hall with an area of **600 m2**

2021

Obtaining and implementing a certificate according to **PNEN ISO 1090-2 in the EXC2 and PNEN 3834-2 class.**

2021

Increasing production to **50 tons** per month.

2022

Change of the location of the production workshop and increasing the production area to **2000 m2.**

2022

Obtaining and implementing the "**WELDING OF RAILWAY VEHICLES AND COMPONENTS** acc. PN-EN 15085-2:2021" certificate.

2022

Increasing production to **100 tons** per month.

2023

Expanding the area to **2800m2** as part of opening a separate hall for stainless steel.

2023

Increasing the execution class according to **PNEN:ISO 1090 to EXC4.**

2023

Increasing production to **200 tons** per month.

2023

Obtaining a recognition certificate from PRS for the construction and repairs of containers.

2023

Implementation of a quality management system in accordance with the requirements of **PNEN ISO 9001:2015.**

Our company is located in Bydgoszcz, Poland, and it is there that we fulfill your orders. Our domain is quality and punctuality in order fulfillment.

Our range of services includes comprehensive welding of steel structures. To provide these services, it is necessary to have the appropriate qualifications, which we have acquired through obtaining certificates compliant with standards such as:

- **PN-EN 15085-2:2021**
- **EN 1090-1:2009+A1:2021**
- **TT/921/710401/23**
- **PN-EN ISO 3834-2:2021**
- **PN-EN ISO 9001:2015**

We accept orders for welding materials such as:

- **Stainless steel**
- **Black steel**
- **Aluminum**

We carry out the welding process of steel structures using various methods, such as:

- **111**
- **114**
- **131**
- **135**
- **136**
- **138**
- **141**

We produce welded structures in accordance with the highest requirements of the **EN-ISO 5817** standard.

The scope of our activities includes comprehensive execution of structures, starting from material procurement to cutting, welding, CNC machining, and anti-corrosion coating.

Our projects cover industries such as:

- **Construction industry**
- **Railway industry**
- **Agricultural machinery**
- **Energy industry**

We provide welding services for steel structures based on customer-provided documentation. In addition to standard elements, we also specialize in joining materials of large dimensions.

Thickness 2**

4

Our possibilities

We have the capability to produce large structures, but we are also open to smaller elements such as ladders, shelves, and railings. We ensure high-quality processing and competitive prices. We carry out assigned tasks both at our facility and at the customer's site.

Our production capacity allows for processing 200 tons of steel per month.

Two production halls with a total area of 2,800 m².

We currently employ 200 people.

We create both small and large structures.

No. 3659/09/2023/J/C

CERTIFYING BODY

Polska Akademia Jakości Cert Sp. z o. o.
ul. Ligocka 103, bud. 2, 40-568 Katowice

CERTIFIES THAT THE COMPANY:

VITWORKER Sp. z o.o.

85-438 Bydgoszcz, ul. Grunwaldzka 235

HAS IMPLEMENTED AND APPLIES THE QUALITY
MANAGEMENT SYSTEM CONFORMABLE
WITH THE REQUIREMENTS OF THE STANDARD

PN-EN ISO 9001:2015

WITH THE FOLLOWING SCOPE:

Prefabrication and assembly of steel structures.
Steel processing services, welding services.

AC 137

CHAIRMAN
of the PAJ CERT Sp. z o.o.

Aleksandra Czaja

THE VALIDITY PERIOD OF CERTIFICATION

from 11.09.2023 to 10.09.2026

KATOWICE, 11.09.2023

6

Production Halls

First Area – 2000 m²: This is a large space with an area of **2000 square meters**, perfect for carrying out large industrial projects. Due to its size, it can be used for various purposes, including material storage, assembly of large structures, or as a workspace for various industrial processes.

Two Overhead Cranes: These cranes are essential industrial equipment used for lifting and moving heavy loads. The first crane has a lifting capacity of **16 tons**, allowing for the handling of very heavy objects, while the other two cranes have a capacity of 5 tons each, ideal for moving smaller but still heavy items. These cranes enhance work efficiency and safety in the workplace.

Application for Welding Black Steel: The entire space is adapted for welding black steel, indicating its specialization in processing and constructing heavy steel elements. Black steel, due to its properties, is often used in construction, machinery manufacturing, and many other industrial applications that require durability and strength.

6

Production Halls

Second Hall - Area 800 m²: This is a smaller hall with an area of **800 square meters**, designed for specialized work. The hall's size allows for efficient organization of work and the flow of production processes while providing sufficient space for working with precision products.

Two Cranes with a 5-Ton Capacity Each: Equipping the hall with two cranes, each with a 5-ton capacity, enables easy handling of heavy steel elements. These cranes provide flexibility in material transport and are essential for maintaining production process continuity.

Production of Stainless Steel Products: The hall's specialization in the production of stainless steel products indicates its dedication to working with a material that requires specific skills and precision. Stainless steel is valued for its corrosion resistance and durability, making it ideal for producing high-quality components in various industries. The tools in the hall are adapted to this specific type of production.
