About Us

The company Vitworker has been operating in the Polish market since 2016. Our main headquarters are located in Bydgoszcz, but we operate nationwide as well as internationally.

What do we do?

We specialize in leasing employees in the metal processing industry. Our services are provided at the client's production facility or any other specified location, under their management and supervision.

Our Resources

We also have our own welding hall where we verify and assess our candidates before qualification tests at the client's facility.

Experience

In Poland, we collaborate with over 30 large plants that gladly recommend us as a reliable and trustworthy contractor who guarantees an adequate number of hands for work.

Outsourcing is a business strategy that allows companies to focus on their core activities while leveraging external resources to handle specific processes. Through outsourcing, enterprises can more effectively manage tasks, achieving higher operational efficiency and reducing costs.

Resource optimization

Outsourcing enables companies to optimize resource utilization, allowing them to focus on strategic business initiatives. This enables internal teams to concentrate on key competencies, while routine and specialized tasks are entrusted to experienced external partners.

Cost control

Outsourcing eliminates the need to maintain a permanent team of employees, allowing companies to better control costs. Firms can adjust their resources according to current needs, eliminating the risk of excessive costs associated with hiring and training employees.

Scalability

Dynamic market requirements often necessitate quick adaptation. Outsourcing enables easy scalability of resources, allowing companies to adjust their processes to changing market conditions without the need for lengthy recruitment and training processes.

Access to specialized knowledge

Outsourcing allows companies to access specialized knowledge and experience that may be crucial for a particular area of operation. By collaborating with specialized service providers, firms can enhance the quality of services provided and operational efficiency.

Risk reduction

Risk reduction: Outsourcing certain processes to an experienced external partner can minimize operational risks. Service providers subject to outsourcing are usually required to maintain the highest quality standards and meet specific efficiency indicators.

Our company specializes in providing highly skilled workforce from the industrial sector to support your enterprise in achieving the highest operational efficiency. Through our dedicated employee outsourcing services, we deliver professional specialists, including welders (all methods), assemblers, CNC operators, and many others, to meet the diverse needs of our clients.

Our key strengths:

Qualified Staff

We handle the recruitment and selection of workers from the industrial sector, ensuring not only the necessary qualifications but also practical experience that guarantees high-quality services.

Timeliness in Execution

We understand the importance of quickly responding to changing market conditions for you. Therefore, we offer flexibility and readiness to provide qualified workers in the shortest possible time.

Support Throughout the Collaboration

Our role does not end with providing workers. We are your partner at every stage, offering full support both administratively and operationally to ensure the smoothness of the employee outsourcing processes.

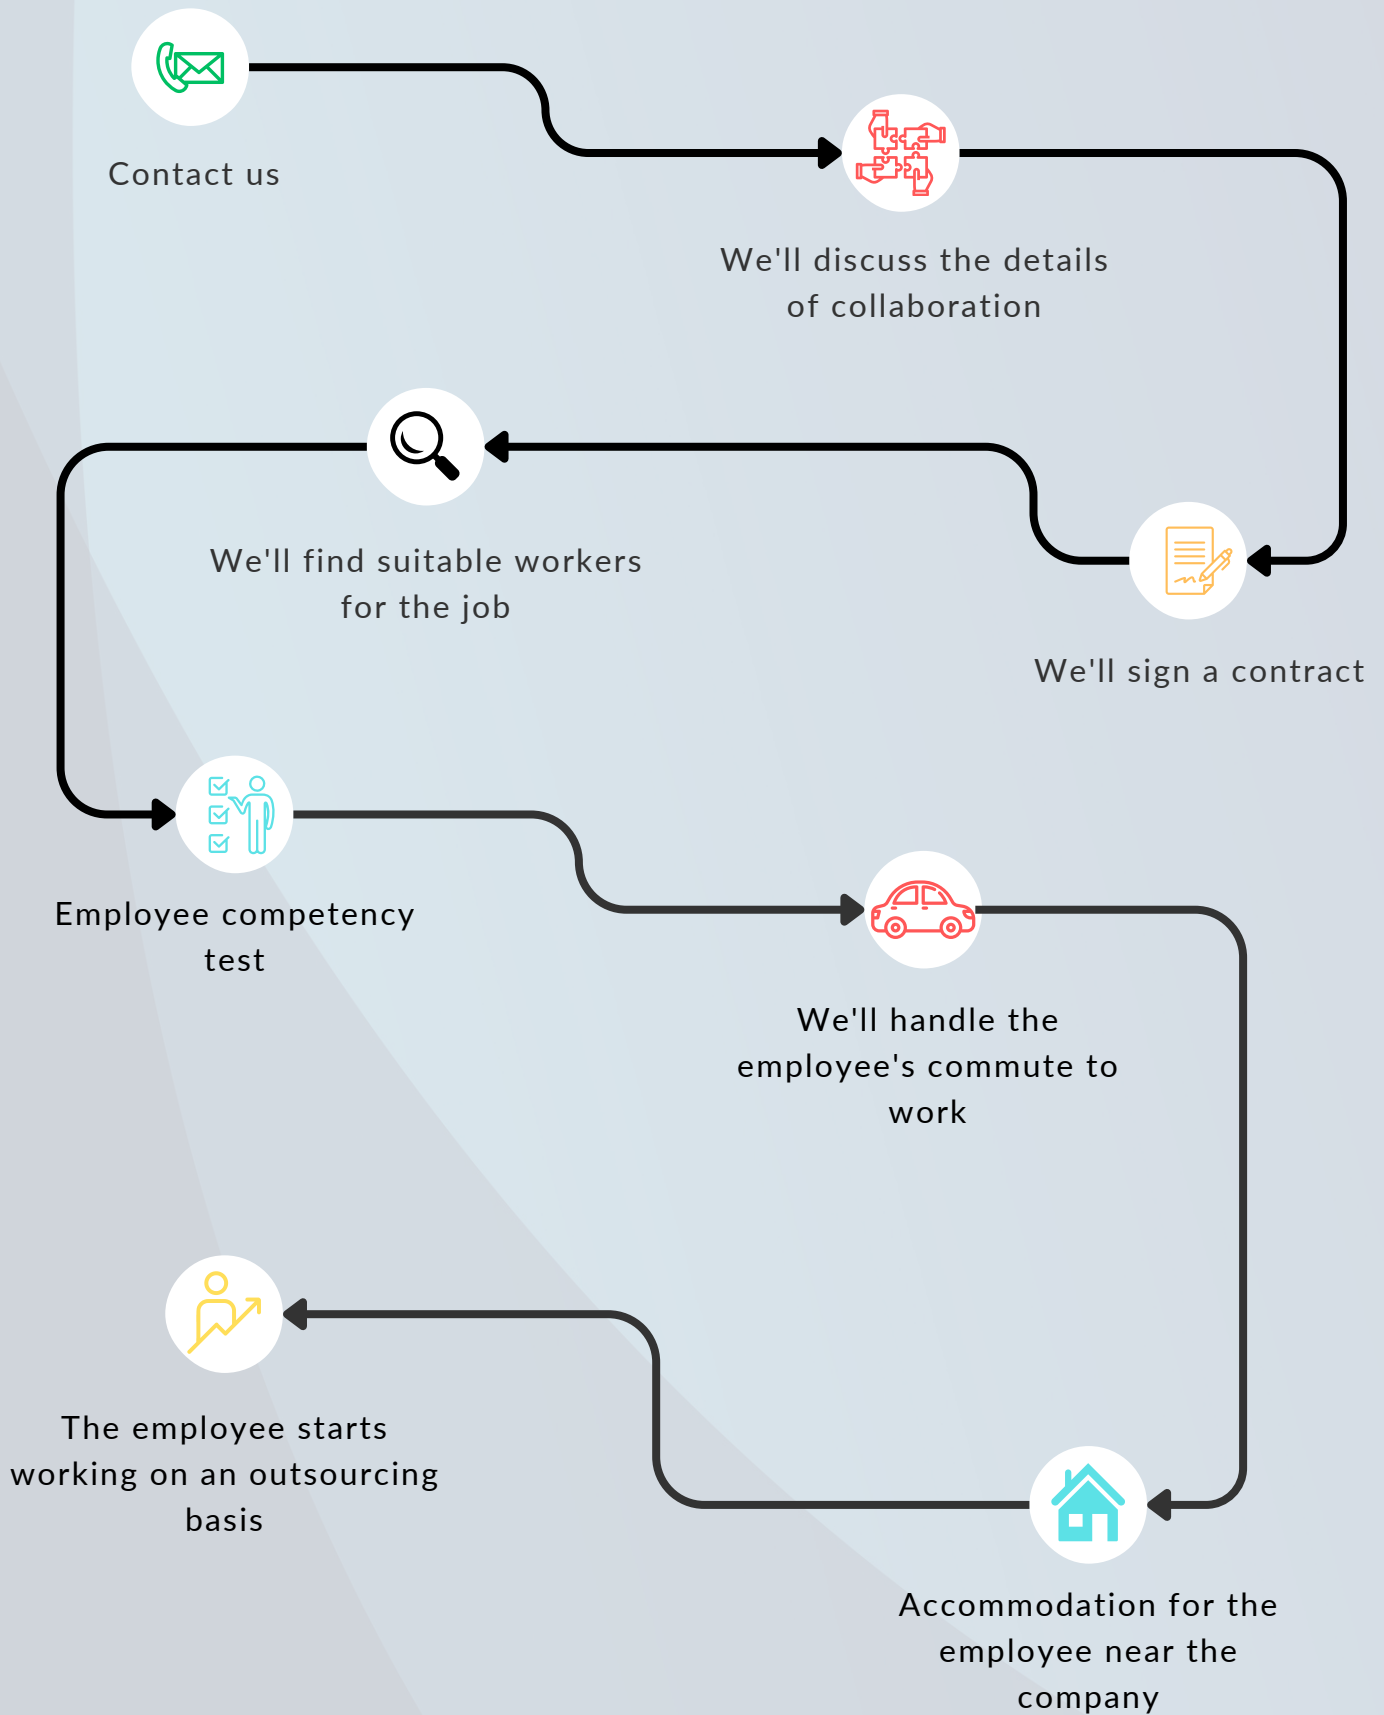

Tailored Solutions

Customized Solutions: We understand that every company has unique needs. Our solutions are flexible and tailored to the specific requirements of the client to ensure optimal results.

By choosing our company to cooperate with, you not only get access to qualified staff but also a partner who is committed to the success of your enterprise. Give us a chance to prove how employee outsourcing can contribute to the efficiency and growth of your business.

Outsourcing Process

Welder

Assembler

Iron worker

Painter

CNC Operator

We undertake orders in the following areas:

- Work on production lines (comprehensive service)
- Work at assembly stations
- Operation of machinery and equipment
- Light and heavy transportation work (forklift operation)
- Warehouse handling - storage, transportation, packaging, and assembly
- Maintenance and upkeep - machine and equipment maintenance, cleaning.

And many other jobs tailored to the client's order. Our solutions are individually tailored to the needs of each client. All actions are based on an analysis of the specific company's needs. We issue VAT invoices for the services provided.

6

Employees

We recruit workers from the East:

Ukraine

Belarus

Georgia

Azerbaijan

Uzbekistan

Armenia

Moldova

India

Philippines

We also have approximately 200 qualified workers on-site, including welders, assemblers, locksmiths, turners, electricians, and grinders, all with current certificates recognized in the European Union. Our employees are professionally prepared to carry out assigned tasks, fully equipped with protective and work clothing, and possess the necessary health and safety examinations and training.

Philippines

By partnering with a Filipino recruitment agency, we can supply practically any specialist regardless of the size of the demand.
